At a glance

What you will be able to do.

01 Build and run CI/CD pipelines that take code from commit to production automatically

02 Deploy, scale and troubleshoot containerized applications on Kubernetes

03 Provision real cloud infrastructure with Terraform — and defend every choice in an interview

04 Monitor and alert like an SRE, with Prometheus and Grafana dashboards you built

05 Handle the scenario-based questions DevOps interviews now lead with

TOOLS

Linux · Bash · Git · GitHub · Docker · Kubernetes · Helm · Jenkins · GitHub Actions · Terraform · Ansible · AWS · Python · PowerShell · Prometheus · Grafana

ROLES IT PREPARES YOU FOR

- DevOps Engineer
- Site Reliability Engineer
- Cloud Engineer
- Platform Engineer
- Build & Release Engineer

LENGTH

6 months

Live online, with recordings.

MODULES

11

Rebuilt from real interview questions.

PROJECTS

4

Work you built and can explain.

What you will learn

11 modules. 6 months.

MODULE 01

DevOps Fundamentals

The framing every interview opens with.

- SDLC and the DevOps lifecycle
- Agile & Scrum basics

MODULE 02

Linux & Shell Scripting

The round every DevOps interview starts with.

- Linux basics, file system hierarchy, essential commands
- User management, permissions, process management

MODULE 03

Git & GitHub

Version control the way teams actually use it.

- Git basics, branching strategies
- Merge & rebase

MODULE 04

Docker & Containerization

Containers, properly — not just “docker run”.

- Images and layers
- Containers: run, manage, interact

MODULE 05

Kubernetes

Where most DevOps candidates fail — and where we spend the most time.

- Pods — the smallest deployable units
- Deployments, updates and rollbacks

MODULE 06

Terraform — Infrastructure as Code

Provision real cloud infrastructure, reproducibly.

- Providers: interacting with cloud platforms
- Modules: reusable infrastructure components

MODULE 07

Ansible

Configuration management and automation at scale.

- Inventory: defining and managing hosts
- Roles: organizing reusable tasks

MODULE 08

Jenkins & CI/CD Pipelines

Pipeline-as-code, the way production teams run it.

- Pipeline: automate build, test and deploy workflows
- Pipeline as Code with Jenkinsfile

MODULE 09

AWS for DevOps

The cloud layer under everything above.

- IAM — manage access securely
- EC2, VPC, ELB, Auto Scaling

MODULE 10

Monitoring, Observability & SRE

What separates a DevOps engineer from a script-runner.

- Prometheus: metrics collection
- Grafana: dashboards and visualization

MODULE 11

Interview Engineering

The module no other institute has — because no one else monitors 50 interviews a day.

- Live question bank from monitored interviews, refreshed monthly
- Weekly technical + HR mock interviews, AI-analysed

Projects

Deployed, not just coded.

You build it, so you can walk an interviewer through it.

PROJECT 01

Full CI/CD pipeline

A three-tier application taken from commit to automated production deployment with Jenkins.

PROJECT 02

Docker deployment

Containerize real applications and ship them.

PROJECT 03

Terraform infrastructure

A complete cloud environment provisioned end-to-end as code.

PROJECT 04

Microservices on Kubernetes

Deployed, autoscaled and monitored with Prometheus and Grafana.

In writing: a project is work you did, in a new domain. We never add experience you did not have, and a project is never placed on a CV as employment.

The interview

Interview first. Course second.

A free AI interview tells you where you stand before you pay for anything.

1
Share your CV
The questions come from it.

2
Answer about 15 questions
Speak or type, like a real interview. Free.

3
Get your score
Out of 100, with where you were weak.

4
Clear 75%
Your CV goes to 3,000 HR recruiters.

5
Get the call
A person releases the offer. The market still decides.

Below 75%? A free counselling call · A plan made for you · A free retake

75%
The clear mark, scored out of 100.

3,000
A 75%+ AI interview score sends your CV to 3,000 HR recruiters.

Based on BrowseJobs internal data. Historical figures — not a promise of individual outcome. Hiring depends on the live market and your performance.

Why BrowseJobs

Every promise in writing.

01

Built from real interviews

The syllabus is rebuilt from the questions interviews ask.

02

Three free steps first

Counselling, a masterclass and a Python bootcamp before you pay.

03

Pay after placement

Three months of CTC, only after you accept an offer.

04

No job guarantee

The market decides. A person releases the offer.

05

Live online

You take the class live online through the BrowseJobs LMS. A recording covers a missed live class.

06

Never a fake CV

Real projects. We never add experience you did not have.

4.9

from 473+ Google reviews, as of 8 Oct 2026

2,683

students placed in 3 years, to Oct 2026

Based on BrowseJobs internal data. Historical figures — not a promise of individual outcome. Hiring depends on the live market and your performance.

Nobody can guarantee employment — the market decides.
What we put in writing is the process.

Google reviews

4.9 from 473+ Google reviews (as of 8 Oct 2026)

Word for word from the BrowseJobs Google Business Profile.

★★★★★

"One of his biggest strengths is his understanding of the current job market and what employers are looking for. More importantly, he has a genuine interest in helping his students succeed."

Pavan S
Google review

★★★★★

"The course is well structured and covers important topics like Python, SQL, Pandas, data cleaning, transformation, and cloud concepts with practical examples and project-based learning."

Dikshita nulageri
Google review

★★★★★

"I also appreciated the opportunity to attend free masterclasses for two weeks before enrolling, which reflected the institute's confidence in the quality of its training and helped me make an informed decision."

Chirag Puthran
Google review

★★★★★

"The team regularly shared useful interview questions, preparation materials, and provided quick responses whenever we had queries or required guidance."

varalakshmi Dakarapu
Google review

★★★★★

"The curriculum was well-structured and covered both fundamental and advanced concepts with practical examples, making it easier to understand real-world Data Engineering workflows."

Charan Kumar M
Google review

★★★★★

"The way Krish Sir explains complex topics through real-life stories makes them easy to understand and remember."

SHUBHAM SINDHU

Excerpts, captured 8 Oct 2026. The rating is for the BrowseJobs business listing, not a single course.

Fees and next step

Three free steps. Then you decide.

FREE · STEP 01

Counselling

With a written Career Analysis Report.

FREE · STEP 02

Live masterclass

See how the course is taught.

FREE · STEP 03

Python bootcamp

Try the work before you pay.

STEP 04

Registration

₹30,000, only after the free steps.

STUDENTS IN INDIA

₹30,000

In full, or **3 × ₹10,000** EMIs. Covers the course.

Placement fee: three months of the CTC on the offer you accept. Due only after you accept, in 6 monthly EMIs, with the ₹30,000 adjusted inside it.

A job is not guaranteed.

STUDENTS OUTSIDE INDIA

USD 600

One payment in US dollars.

No EMIs and no placement fee.

A job is not guaranteed.
